

YOU TYPE, THEY SPEAK !

Proposed by Monique Phuong Mai

This one is real good and will amaze you. You type whatever in the left box and then press "say it" button and she (or he) says what you have typed and her eyes will follow the pointer.

You Type...She (he speaks) speaks...technology has far surpassed me!!!
This is amazing. Try it and see!! *Turn up the volume.*

She will say anything you type. I sure don't know how they do this! When you move the mouse around, her (his) eyes follow the pointer. When you write something in the left space and then click on 'Say it,' she (or he) says it!

You can also change persons doing the talking and the language they speak.

Technology! Wow!
